Brebes, Central Java

I am Ahmad Fatikin, a recent graduate from Dian Nuswantoro University majoring in Informatics Engineering, with the ability to understand various programming languages as well as skills in operating Microsoft Office. I have an understanding of hardware, software, database management, and networking. I have also obtained TOEFL and web development certificates. I actively contribute to the field of information technology with interests in software development, quality assurance, data analysis, data security, and networking. My goal is to continuously improve my skills, provide innovative solutions, and support continuous renewal in the world of technology.
