EDUCATION

(2022-Present)

Bina Nusantara

Students of Data Science

(2019-2022)

Al-Chasanah Senior High School

Natural Science Major

SKILLS

- Data Analytics
- Data Mining and Visualization
- Database Management
- Machine Learning
- Big Data and Infrastructure
- Web Development.
- Ability to work both collaboratively and independently.
- Capable of utilizing Tableau effectively
- Programming Languages: Python, R, SQL, HTML, CSS, PHP, and JavaScript.

PROFILE

My educational background from Bina Nusantara University in the field of Data Science has sparked my interest in the realm of computers, particularly in data analysis and front-end web development. Consequently, I aspire to become a data scientist or programmer within a company.

PROJECT EXPERIENCE

Participating in TLX Toki INC 2024

- Completing the problems prepared by the campus committee using various programming languages, including Python and C, and successfully achieving a commendable score.

Developing a Deep Learning Project

- Developing a project focused on object detection utilizing an RNN model in the Python programming language.

Developing Website Project

- Develop a web project that features a Vegetarian and Movie Box website utilizing HTML, CSS, and JavaScript.
- Hosting a website using AWS services, specifically EC2, to ensure online accessibility.
