Skills

- HTML, and CSS
- TailwindCSS
- Redux
- Reactjs
- Vuejs
- ExpressJs
- Docker
- Linux SysAdmin
- Networking
- CI/CD
- Git

Projects

my mini project that has been created

1. BMI Calculator

The screenshot shows a web form titled "Check your BMI". Below the title is a subtitle: "Enter your weight and height below to check your BMI results". There are two input fields: the first is labeled "Put your weight in here (KG)" and contains the placeholder text "Input your weight"; the second is labeled "Put your height in here (CM)" and contains the placeholder text "Input your height". Below these fields is a blue button labeled "Calculate BMI".

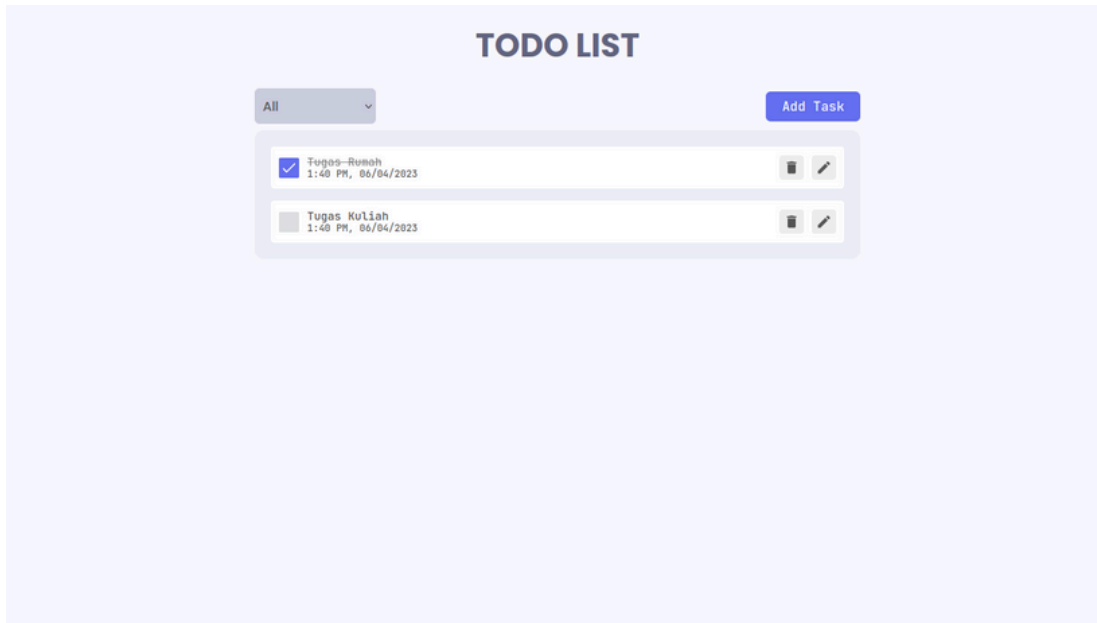

About Project

It is a body mass index calculator application by determining who is in a healthy and unhealthy weight group where this application uses HTML, CSS, and JavaScript technologies.
