I am a detail-oriented product manager with years of experience in the IT technology sphere. My skills are good, and I am strongly committed to research to solve the team's problems. Before becoming a product manager, I worked as a Programmer and QA Tester with around 6 years of experience working in IT.

Pengalaman Kerja

Product Manager • [eKan.id](#) - PT Era Kayacipta Anak Nusantara

Aug 2022 - Now | Jakarta, Indonesia

- I'm researching users based on their pain points before developing new features.
- I created designs (lofi and hifi) and requirements for new features and then explained them to the developers.
- I was doing manual testing to avoid bugs and handling the reported bugs from users.
- Gathers, manages, and prioritizes market/customer requirements. And also handling user opinions regarding difficulties or convenience when using programs that have been made.
- Leading the sprint, daily meetings, and important meetings with the stakeholders and third parties about the B2B and B2C spheres.
- Defines the product vision, strategy, and roadmap.
- Acts as the customer advocate articulating the user's and/or buyer's needs.
- Works closely with engineering, sales, marketing, and support to ensure business case and customer satisfaction goals are met.
- Runs beta and pilot programs during the qualifying phase with almost final products and samples. In Agile environments, regularly reviews completed work and checks with customers to ensure that it meets the customer's expectations.
- Acts as the product's leader within the company.
- Also, I handled 1 on 1 with all the team members, handled KPIs, and reviewed probationary developers.

Project Manager • [lussa.net](#) - PT Lussa Teknologi Global

Jan 2022 - Dec 2022 | Bandung, Indonesia

- Test the product (web or mobile app) to make sure that the product has a little bit or maybe none of the bug(s).
- Leading the sprint, daily meetings, and important meetings with the stakeholders.
- Setting project goals and coming up with plans to meet those goals
- Maintaining project timeframes, budgeting estimates, and status reports
- Managing resources for projects, such as computer equipment (sometimes) and employees
- Coordinating project team members and developing schedules and individual responsibilities
- Implementing IT strategies that deliver projects on schedule and within budget
- Using project management tools to track project performance and schedule adherence
- Conducting risk assessments for projects
- Organizing meetings to discuss project goals and progress
