About Me

I am a strategic and analytical thinker, Data Analyst focused on generating insightful analyses to solve complex problems. I have experience analyzing sales performance in retail chains that faced losses for 21 months, revealing critical insights regarding product profitability. Leveraging my expertise in data analytics tools such as SQL, Python, Google Spreadsheets, Tableau, and Power BI, I provide actionable recommendations that drive strategic decision-making. My training at RevoU has further enhanced my data analysis and problem-solving capabilities. As a collaborative Data Analyst, I effectively communicate results through clear visualizations tailored for stakeholders. I am confident in my ability to make a significant impact in your organization.

Project Experiences

Sales Performance Analysis, RevoU Final Project

July, 2024 – September, 2024

- Analyzed the toy store's 21-month sales performance, identifying that costs exceeded profits, and implemented structured problem-solving and root cause analysis, resulting in a 5% increase in efficiency.
- Developed a sales performance analysis for the toy store using Google Spreadsheets, Python, and Tableau, resulting in actionable recommendations that boosted profits by 5% within three months.
- Leveraged data communication skills to present analytical results to stakeholders, achieving a 5% increase in profits and helping to avoid greater losses.
