Tangerang, Banten, Indonesia

Final Year IT Student | President University

I am Aninda Putri Ramadhani, a final-year student at President University majoring in Information Technology. With hands-on experience from internships and academic projects, I have developed solid skills in data analysis, database management, and software engineering. I am passionate about exploring and applying best practices in software/hardware development, as well as analyzing data to provide actionable insights. My interest in information technology has also been expanded through various small projects, including work on exchange rates.

Work Experiences

PT. Duniatex - Ungaran, Jawa Tengah

Oct 2023 - Dec 2023

IT Support Internship

Handle some hardware such as wifi and routers to be well stabilized, apply CCTV, and some other hardware, make an orderly layout.

PT. Mitsubishi Electric Automotive - South Cikarang, Jawa Barat

Jan 2024 - May 2024

Database Programming Developer Internship

continuing programs and developing programs that have been created by previous people using the vb.net language and recording incoming and outgoing goods

President University - South Cikarang, Jawa Barat

Jul 2024 - Oct 2024

Data and AI generate Internship

I have experience in managing data. In addition, I focus on automation and optimization, developing automated solutions to improve operational efficiency and business processes. I also have skills in Natural Language Processing (NLP), such as building text analysis systems and AI-based applications to understand and process human language data.

Education Level

Universitas Presiden - Bekasi Regency, West Java

Sep 2021 - Dec 2024 (Expected)

Bachelor of Science Computing, 3.36/3.36

Organisational Experience

PUMA COMPUTING - Compgath

Oct 2022

Creative

I am part of the creative team responsible for guiding juniors to the right location and time, and providing directions according to the predetermined schedule.

Pemimpin.id - ASEAN DSE 2023

Apr 2023 - May 2023

fullstack data analyst

learn to analyze data that has been arranged and selected by the admins, and learn together by reading several guides

My Skill - volunteer program

May 2023 - Jun 2023

Fullstack Data Analyst

I joined an external volunteer program focused on data analysis to enhance my skills and gain practical experience in applying data-driven insights to real-world projects.

Skills, Achievements & Other Experience

- Achievements** (2023): Taking intensive training that includes: Introduction to Data Analysis, Basic Statistics, and Data Cleansing Using SQL and Python for data analysis Data Visualization with visualization tools such as Matplotlib and Seaborn This bootcamp strengthened my understanding of the entire data analysis workflow.
- Achievements** (2023): Data Science: Data analysis and modeling. SAP Analytics Cloud: Experience in data analysis and visualization. Intelligent Discovery: Explore data to find insights. User Interface (UI): Design effective data visualizations.
- Projects** (2023): Used SQL to query and manage large databases, perform data extraction, and optimize query performance for more efficient analysis. Used Google Looker to create interactive dashboards and visual reports to effectively present data findings to management teams. Collaborated on Google Colab for advanced data analysis, data modeling, and collaborative data processing with teams using Python and related libraries.
