Back End: Node JS, Express, Sequelize, PostgreSQL, GraphQL, Apollo Server, MongoDB, Redis, Rest API, ORM, MVC, TDD, Jest, AWS, Docker

PROJECTS

Ayax   *Sep 2024*
A mobile and website-based application designed for simplifying an event creation. From setting up ticket sales to managing participants, Ayax gives you everything you need to create successful events—no matter the size.
Tech stack: React React Native, Next.JS, Typescript, MongoDb, Vercel, JWT, Expo, Gmaps, Bycrpt, Axios

6 Hour   *Sep 2024*
A web-based e-commerce application designed for selling fashion products. Users can browse the catalog, log in, register an account, and add products to their wishlist

Tech stack: React, Next.JS, Typescript, MongoDb, Vercel, JWT

Youbook (Facebook Clone Mobile)   *Sep 2024*
A mobile app based on the Facebook mobile UI and functionality. The application allows users to create accounts, build profiles, and connect with friends. Users can share posts, upload photos, and comment on their friends' updates, mimicking the core features of Facebook.
Tech stack: ReactJS, Express.js, PostgreSQL, JWT, Socket.io, Jest, AWS

Kyra Messenger   *Sep 2022*
Kyra Messenger is a web-based chat application that allows registered users to communicate with others in a global chat environment. Users can send and receive real-time messages and update their profiles, making it easy to stay connected.
Tech stack: React JS, Vite, Redux, Socket IO, Express, Sequelize, PostgreSQL, Supabase,

Ymedia   *Sep 2022*
A web-based social media application where users can engage in typical social media activities such as posting threads, commenting, liking posts, and updating their profiles.
Tech stack: React JS, Redux, Express JS, Gemini AI API, PostgreSQL, Sequelize, Supabase, AWS C2, Firebase, JWT, Google oAuth

Job Portal Web   *Aug 2022*
A web-based application to display available jobs on the platform that the hiring partner posts. Hiring partner can upload, update, and delete their careers in the CMS
Tech stack: React JS, Redux, JWT, Vite, Express JS, Sequelize, PostgreSQL, Firebase, AWS C2, Supabase

SIMONTANA Mobile   *Aug 2022*
SIMONTANA is an application that provides easy access to data and information related to forest resources across Indonesia. It supports effective and sustainable forest management by allowing users to swiftly and accurately monitor the state of forests, including deforestation, reforestation, land cover changes, and forest degradation. The app helps in planning and monitoring forest resources and contributes to the compilation of environmental quality index (IKLH) data for each province.
Tech stack: React Native, Typescript, Axios, JWT, Redux, Context, Zustand
