About Me

"I have 3 years of experience as a data analyst, where I collected and processed sales, brand expenditure, and market data to inform decision-making. With over 5 years in the Food & Beverage industry, I've developed expertise in operational management, menu development, and team leadership. My analytical skills have played a key role in optimizing operations and improving performance. I am committed to leveraging data as a strategic asset to deliver innovative, data-driven solutions that support business growth and development."
