ABOUT ME

I am graduated from Jakarta State Polytechnic majoring in Electrical Engineering with program study Broadband Multimedia. As an engineering student, I learn about weak current, several programming languages, IoT, Project Management, Fiber Optic, Celuller and K3. I am highly motivated and curious about new things, able to learn and competent, i am able to adapt to work in a team, and i know how to manage time.

WORK EXPERIENCE

Intership - Network Engineer   2019
Politeknik Negeri Jakarta

1. Justifying the internet and WIFI
   a. Make a new port on switch
   b. Install WIFI with LAN cable from switch
2. Input a new hardware to one file
   a. Scan QR code from the new hardware
   b. Make an excel file for an evidence data

Contract - ETL and Database Engineer   2020
Dua Tretan Sejahtera

1. Create automation Data ingestion Oracle to Oracle dukcapil Padang
   a. Creating repository using pentaho ETL (Extract Tranfer Load)
   b. Creating table space on oracle
2. Monitoring Job
   a. Scheduler task on windows and log files

Contract - Database Engineer   2020
Dedicated - IT

1. Data migration from MySql to MSSql (Sql Server)
   a. Create views with local time format GMT+11 (with Daylight Time 'DST')
   b. Translate query format MySql to query MSSql
   c. Create Function on MSSql
   d. Describe data format from MySql to MSSql
2. Metabase analystic web dashboard migration
   a. Responsible of converting from old version metabase to new version metabase
- Data type with relationship tables
- Creating option filter on dashboard
- Creating dynamic variable
- Question / Query designer
- Dashboard designer
- Creating user account and setting privilage
3. Validating result
   a. Compare each report on visualization on metabase analytic system
- Comparison report using Excel befor and after
- Summary report using word for conclusion
   b. Make sure every format and number exactly same
- Comparison using picture to picture

WORK EXPERIENCE

Contract - Tester Engineer   2020
Nusantara Teknologi Solusindo

1. Testing web dashboard EMONEV kemendagri
   a. Login system
   b. All menu running well
   c. Chart all show up
   d. All button and function not error
2. Validating Result
   a. Comparison report on system vs manual
   b. Checking result export by system same with requirement

Contract - Database Engineer
Nusantara Teknologi Solusindo   2020

1. Mugration Query to Store Procedure
2. Optimize Logic Code on freamework Codeigniter (PHP)
3. Testing web dashboard Siksdroid Kemensos
- Login System
- User Control and setting privillege (ACL 'Access Contol List')
- All Menu Functionality
- All Picture loaded
- Map function
- Checking Heirarchy Method on user

Contract - OSS Engineer
Elabram - ZTE Swap Project   2020-2021

1. Collect daily raw 2G 3G 4G from source NOKIA OSS
2. Collect daily raw 2G 3G 4G from source ZTE Minos
3. Build system automatic by Airflow (Phyton) for handling job Processing and Calculating data
4. Create Database with Postgres (Heavy or Long Periode Request) and Mysql (Web request)
5. List report:
     a. cell, site, batch, cluster, kota, branch performance 2G 3G 4G hourly, daily, weekly, monthly
     b. cell, site, batch, cluster, kota, branch performance busy hour base on PRB (4G), payload (2G 3G 4G) user (3G), and by requested
     c. top 5, 10 worstcell, site, branch, cluster, kota, branch daily, weekly, monthly base on each kpi monitoring
     d. cell, site, batch, cluster, kota, branch total traffic and payload by network or all network hourly, daily, weekly, monthly
     e. comparison site by site or other lever group for swap activity
     f. zero traffic or payload cell basis
     g. MOM. WOW, MTD, YOY, YTD report
     h. percentil calculation report
6. Daily maintaince server as monitoring storage, zombie process, and other
7. Create metabase "analytic tools"
8. Create web monitoring "event basis"
9. Build system notification by wa or telegram
10. Create makro cell excel template "event basis"

WORK EXPERIENCE

Intership - General Administration

Train4Best   2023-2024

1. Create a daily schedule for telecommunications training.
2. Coordinating telecommunications training for trainees.
3. Create TOR documents that must be loaded by the project management team before a project starts.
4. Become a digitalent training admin with Kominfo
5. Create training materials and practice questions for telecommunications training.
6. Make daily training reports for team evaluation.
7. Make reports on the grades of training participants.

SOFT SKILLS

- Communication
- Teamworrk
- TIme Management
- Easy to Adapt and Socialize
- Leadership
- Entrepreneur

PROJECT

- 5G Network Performance Analysis for Telkomsel Providers in Arterial Areas Permata Hijau South Jakarta, Against Youtube Live Streaming Services Using the Wireshark Software.
- YAGI UDA ANTENNA DESIGN TV RECEIVER ON A FREQUENCY OF 600 MHz.
- Application development using Android Studio.
- RF Network Planning Simulation Report LTE (Long Term Evolution) in Braga, Bandung City, West Java Using Atoll Software.
- RF Network Planning Simulation Report LTE (Long Term Evolution) in Politeknik Negeri Jakarta, Using Atoll Software.
- NETWORK DESIGN LTE 1800 MHz BANDWIDTH 20 MHz URBAN WITH DL CELL LOAD 60%, TRAFFIC RATIO 2:4.
- Create an Automatic Trash Project Using Arduino.
- Make a Fiber Optic Network Design on Abdul Majid Street.
- BROADBAND COMMUNICATION NETWORK OSPF, EIGRP AND BGP ON CISCO PACKET TRACER.
- Network Planning Fixed & Cellular Network.
- Be a member of the OpenRan 4G Smartlab Team.
